Footnotes indicating USDA Government Purchases are shown in connection with commodity tables herein when segregation of such purchases were reported to the Market News Service by the carriers. Cars shown in these footnotes do not always represent complete Government purchases of the commodity in question. This is due to the fact the railroads cannot always readily identify these purchases as such.

Imports as originally reported by the carriers have been adjusted to basis of official records of U. S. Department of Commerce. These data were usually recorded by pounds, necessitating conversion to carlot equivalents. The equivalents used for this purpose are indicated in footnotes. Conversions were made to the nearest carlot equivalent - - half cars and over being considered as a carlot.

Truck shipments are included insofar as these data were obtainable. The same factors which have been in use for several years for converting truck shipments to carlot equivalents were used, and this should be considered when comparing truck data with rail. Exception: Citrus - See footnotes at bottom of Citrus tables.

The carlot shipments summarized herein were furnished the Fruit and Vegetable Market News Service by railroads, boat lines, and the Railway Express Agency. This cooperation is gratefully acknowledged.

#### GENERAL NOTES

- \* \* Incomplete - Based on Pre-War carlot equivalents
- 1/ Based on Los Angeles, San Francisco, and Oakland unload reports.
- 2/ Obtained from Florida State Marketing Bureau.
- 2/ Obtained from Inspection Reports, Supervising Inspector.
